Program of Information Science and Engineering

Graduate School of Information Science

Nara Institute of Science and Technology

Supervisor: Professor Minoru Okada

Network Systems Lab. (Division of Information Science)

January 5, 2021

A Master's Thesis  
submitted to Graduate School of Information Science,  
Nara Institute of Science and Technology  
in partial fulfillment of the requirements for the degree of  
Doctor of ENGINEERING

Yu Cheng

Thesis Committee:

Professor Minoru Okada  
(Supervisor, Division of Information Science)  
Professor Yuichi Hayashi  
(Co-supervisor, Division of Information Science)  
Associate Professor Takeshi Higashino  
(Co-supervisor, Division of Information Science)  
Assistant Professor Quang-Thang Duong  
(Co-supervisor, Division of Information Science)  
Assistant Professor Na Chen  
(Co-supervisor, Division of Information Science)

# Coil Array Inductive Power Transfer System for Autonomous Underwater Vehicle\*

Yu Cheng

## Abstract

For a long time, providing a stable, safe, and efficient power supply for underwater electromechanical equipment has always been a concern in deep-sea exploration. Compared with the complicated docking mechanism, potential safety hazards, and expensive price of traditional wet-mate connectors, wireless power transmission (WPT) technology can transmit energy without any electrical contact between the power supply and the electrical equipment, which provides an effective solution to the aforementioned drawbacks of wired charging. There are many uncontrollable factors in the seawater working environment. Therefore, this topic takes the equivalent circuit and magnetic field distribution as the theoretical basis to study the energy transmission characteristics of underwater WPT and proposes corresponding improvements and solutions to the current problems and deficiencies. Especially for the unstable output voltage of the receiver and excessive magnetic flux density at the internal of AUV.

## Keywords:

autonomous underwater vehicle, inductive power transfer, underwater wireless power transfer, undersea
